INTRODUCTION

This environmental policy provides the framework for Repligen Sweden AB's (RgenSE) Environmental Management System. This policy supports Repligen's Global Environmental, Health and Safety Policy.

1 Environmental policy

We are **aware** of the climate change and the environmental impact caused by society. We believe that it is important to create a **sustainable** society that enables **growth** for the company without compromising the future of coming generations. We take our **responsibility** by working to reduce the environmental impact from our company's operations.

We have chosen to certify our environmental management system according to **ISO 14001**.

We work with a long-term perspective and integrate the environmental work across the business, from raw material to product. We are actively working with our environmental objectives.

We **economize** the earth's resources by streamlining our production, using the best available technology and working with continuous improvements.

We have a **safe** management of our production and **prevent** all forms of pollution.

We comply with compliance obligations and are **responsive** to other environmental expectations.

We strive to be a good **role model** and have **good relations** with the authorities and other stakeholders and **openly** report our environmental impact.
