Subject: **AVIPure® dsRNA Clear Animal/Human Origin Statement**

To whom it may concern:

AVIPure® dsRNA Clear Affinity Resin is manufactured in the United States. All primary and secondary raw materials (starting materials and process aids) are confirmed to be of non-animal and non-human origin or synthetically derived. While incidental contact at supplier facilities cannot be completely ruled out, Repligen's manufacturing processes have been evaluated through established quality and risk-management systems and are considered effective in mitigating potential TSE/BSE risks in the final product.

Sincerely,

James Hendrickx
