INTRODUCTION

This quality policy provides the framework for Repligen Sweden AB's (RgenSE) Quality Management System. This policy supports Repligen Corporate Quality Policy.

1 Quality policy

We are dedicated to produce high quality products that help the biopharmaceutical industry to **safely** and **cost-effectively** produce pharmaceuticals to patients worldwide.

It is important that our customers have **confidence** in **us**, our **products**, our **knowledge** and our **quality system**. To accomplish this, openness, a holistic view and good knowledge of our role in the entire value chain, and how we can influence this, are of utmost importance.

Quality is a strategic advantage for us. Since many of our customers work under GMP requirements we have, in order to ensure customer quality demands, chosen to base our **ISO 9001** certified quality system on **EU GMP**.

Our products are **critical raw materials** for our customers and to ensure product availability, we are working actively to ensure business **continuity**.

To continue to meet our customers' demands for **functionality**, **safety**, **quality**, **flexibility**, **capacity** and **pricing**, we actively work with quality objectives and continual improvements.
